Low Wattage (5W) Type Solenoid Operated Directional Valves

Direct Acting Type Low Wattage Valves in Series

3 types of Direct Acting type Solenoid Operated Directional Valves, E-DSG-005/01/03, with suppressed consumption power to 5~6W were launched in series.

1 Features

1

Because these valves consume only 5~6W of power which enables remarkable reduction of operating cost.

Standard **DSG Series**

[DSG- 01 : 29W
DSG- 03 : 38W]

Low Wattage Type **E-DSG Series**

[E-DSG- 01 : 5W
E-DSG- 03 : 5W]

2

Since these valves operate on only 5~6W, they can be driven through the output circuit of a programmed or sequence controller. This feature simplifies the electric circuitry and enables savings in initial cost.

3

These low wattage valves minimize coil surface temperature.

2 Specifications

Model Numbers	Max.Flow Rate L/min	Max.Operating Pres. MPa	Max.T-Line Back Pres. MPa	Max.Change Over Frequency min ⁻¹
 E-DSG-01-***-D*-60	30	16	16	240
 E-DSG-03-***-D*-50	50	16	16	240

★The maximum flow differs according to the spool type and operating conditions.For details,please contact us.
